Go-Live Announcement: The Ship Has Set Sail!

It is with great pleasure I announce that AGAPPE has launched its Microsoft Dynamics Navision ERP system on the global platform on 14th April, 2014. The inauguration (Go-Live) was blessed by our Honorable Chairman Prof. M.Y. Yohannan at our Corporate Office. The maiden voyage was kicked off with the successful entry from Sales Order to Invoice.

It was hard to fathom at the beginning of Q4 of last financial year, that the implementation would be so smooth and would be successful, but with the support of the Management, the Steering Committee Members and all the wholehearted commitment and devotion of the Project Alpha team members and our implementation Partners "M/s. ABS Pvt Ltd., Bangalore", we have successfully achieved. Over the course of the last 105 days there were times when each of us was swamped and overwhelmed; however, all of the project team members stayed the course and worked hard until the better end. After testing the software from stem to stern we gave the new system a clean bill of health and made the commitment to move forward by going live this week.

Congratulations to all of the key users in AGAPPE whose involvement contributed to the success of this project. I would recall and acknowledge the valuable support we received from each department.

I would once again like to extend my sincere appreciation to the Steering Committee members and ABS Team Seniors for their continuous guidance and oversight throughout the project. The teamwork was outstanding and played the vital role in the successful implementation of this project.

With Best Regards

Thomas John
