

## Investment in an ERP adds 2% to your bottom-line: CRISIL

Here are some very interesting insights uncovered by CRISIL who have conducted a research on 4500 small enterprises (with annual revenue around Rs. 5 Crores):

- Only a mere 4% of small enterprises have implement business process management systems such as Enterprise Resource Planning (ERP)
- 96% of these enterprises limit their operations to basic computer-based management information systems or use simple software like MS.Excel in order to 'save money'.
- The average operating margins for businesses with ERP is 10% whereas 8% for business without ERP
- ERP enables businesses to reduce inventory by 12%.
- CRISIL's findings demonstrate that ERP are required by companies in the revenue range of 5-10 crores as well.

Smaller organizations have resisted investing in and adopting ERP solutions because of the perception that ERP is expensive, difficult to implement and time-consuming. ABS Baadal offers pre-configured solutions for specific industry verticals that can be “Rapidly Deployed” in a matter of weeks, enabling your organization to get ready for GST quickly, easily and with minimal risk and investment (at affordable subscription price-points). ABS Business Consulting can help an organization adapt to and leverage the ERP to add an estimated 2% to your bottom-line.
